BALDWIN'S

1936

Dependable Nursery Stock

Each year when we send you our annual catalog we do so with real pleasure in continuing old friendships and making new ones, and with a certain pride in knowing that during the past forty-seven years we have faithfully fulfilled the trust of our many customers in us and have been of real service to them by giving honest value in good nursery stock.

Dependable Good Quality—Right Price—Baldwin Service ★

When you buy nursery stock, farm tools or any other items you look for three things—dependable good quality; the right price for that good quality; and real service that helps you to select the right article for your needs and to get the most out of it, and finally, gives a more careful consideration for your best interests both before and after you receive your shipment. You will find these things in full measure when you do business with Baldwin. Michigan Northern Grown Hardy Plants and Trees are more vigorous growers and better producers in all sections. This is proven by the records of our thousands of satisfied customers for nearly fifty years.

Wayzata Everbearer

"Better in Every Way"
\$1200 from 1 Acre

Fruit Pays For Market or Home

More fruit is one of the things that is necessary to a full return to normal, profitable management. Fruit is equally needed in the home garden and the commercial field. Good farmers are wisely spending more of their increased income in larger fruit plantings, because they know that good fruit crops are always a part of profitable farm operations. This is especially true now when the U. S. Department of Agriculture forecasts an increase in industrial activity for the next three years that will make a 10% to 15% greater demand for fruit and other farm products. Baldwin has every plant and tree your fruit business needs and is well qualified by long experience to take care of your fruit plant orders in the right way, and can give them the personal attention that assures your entire satisfaction.

**LOWER
PRICES
FOR
1936**

Here is what Government Experiment Stations say about this remarkable berry:

1. Far superior to any other everbearer.

2. Larger than Mastodon.

3. Most attractive appearance.

4. Bears heavier than Mastodon.

5. Best of all everbearers in quality and flavor.

(Further Description Page 4.)

Premier

Premier Pays early profits

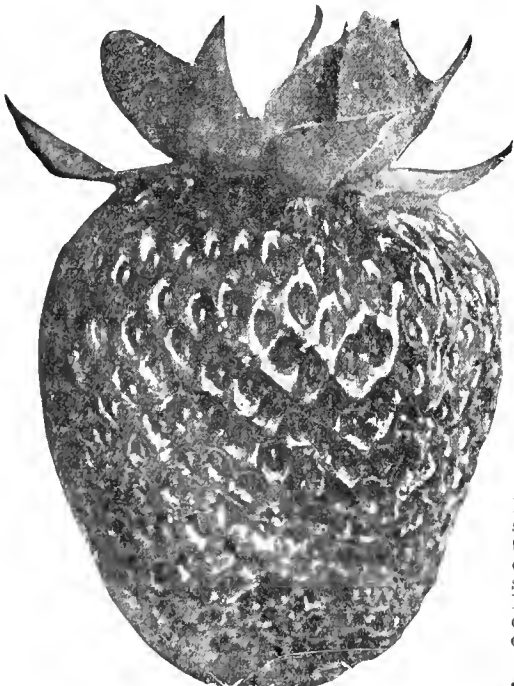

What more can you expect of any berry? And this proves true in every patch the country over. Here are a few reasons why—

1. Ripens with the first.
2. Long fruiting season.
3. Unusually large crops.
4. Size above the average.
5. Bright, glossy, solid color.
6. Uniform, attractive shape.
7. Buyers pay a big premium for Premier.

Actually millions more Premier plants have been sold the last few years than any other kind. Growers know that Premier is an unfailing money maker every year. Consumers demand it. You will need to grow Premier—and plenty of them—to be in the berry business profitably.

Our 1936 Premier prices are low for plants that are guaranteed true-to-name, healthy and vigorous—the supply is always short. Order at once so we can reserve yours.

Price—100 for 75c; 1000 for \$4.00

Beaver

Beaver —Early

Productive Hardy Berry

A newer variety recently originated in Wisconsin and has proven a satisfactory producer in all northern fruit sections. A cross between Premier and Dr. Burrill, Beaver berries have the bright attractive appearance and uniform shape of Premier, but like Dr. Burrill it is a much better plant maker on any good land and is especially recommended for poorer soils. For this reason, Beaver is more certain than Premier to bring regular good crops.

Beaver Has Proven Its Value

Fruiting season is long, beginning with Premier. Local Beaver growers received the same high prices paid for Premier. Its ability to produce plenty of new plants firm, fine colored berries, and big crops in good or bad seasons will make a leader. We have genuine Beaver and are making an unusually low price on them. You will be right in planting a good quantity.

Price—100 for 80c; 1000 for \$4.25

STRAWBERRIES

Bring Full Crops Every Year

Every farm family should grow strawberries. There is no other fruit that is so easy to grow or so quick and sure to bear a full crop. For market, you can depend on strawberries for regular annual profits, and for home use they save money and are ready with fine fresh fruit when you want it. Only a small space will make a surprising net profit and will do it in only one year's time.

Senator Dunlap —Mid-Early

Certain Crops In Every Location

Perhaps no other strawberry is so well and favorably known throughout the country. It has the reputation of producing full crops in a wider range of soil and climate than any other variety. No wonder growers in nearly every state in the Union order more of this old reliable berry every year. Today Senator Dunlap is one of three or four strawberries that buyers know and ask for throughout the country.

Uniform berries of dark red color. Splendid shipper and ready seller because of its attractive appearance.

Many canning factories want nothing but Senator Dunlap and contract for thousands of cases yearly. They know it always holds its shape and rich color long after canning—and that the flavor lasts.

Price—100 for 70c; 1000 for \$3.35

Dr. Burrill —Mid-Early

Good Crops In Wet or Dry Seasons

A most remarkable berry—one of the best all-round Strawberries ever produced—really in a class by itself. Commercial growers always feel safe in planting it—and sure of its ready sale at good prices. Home growers have good success and find it so easy to raise.

As a dry-weather producer it can't be beaten, the long roots taking moisture from a greater soil depth and producing heavier crops than most varieties under similar conditions.

Price—100 for 70c; 1000 for \$3.35

Gibson —Mid-Late

An Old Variety, Still One of the Best

That fact alone speaks volumes for its all around excellence. There is no question about its being one of the most profitable strawberries grown. A strong pollinizer and vigorous plant maker; thrives in all soils and climates. Two to four large fruit stems on every plant loaded with great, handsome, glossy berries.

Gibson possesses an exceptionally fine flavor. The ideal berry for table, market or canning. Its good appearance always sells it. You can depend on Gibson.

Price—100 for 75c; 1000 for \$3.75

Big Cooper —Mid-Early

Big Berry

Here is a berry that is not considered by many growers but it should be. Although inclined to be soft on long hauls in rainy weather, it is a fine berry because of its attractive color, deliciously sweet flavor and enormous size. It has earned a market of its own and more growers are planting Cooper with profit.

BIG YIELD

Nine COOPER make a layer in a full size quart box—27 fill the box. That gives you some idea of the size of this magnificent berry, and explains too, why they sell for 10 to 12 cents more per quart than other fancy varieties.

BIG PROFIT

For profit on the roadside market there is no better seller than this mammoth berry. Sugar-sweet delicious flavor. Big, thrifty-growing plants that protect the berries from sun and keep them fresh and sweet for every picking.

Price—100 for 85c; 1000 for \$4.65

Make A Profit Every Year

These Tested Varieties Are Best

It is important that you start with good plants. Our 47 years experience means that Baldwin's plants are the kind you need—guaranteed true-to-name, full of vigor and in healthy planting condition when you get them. You cannot get better anywhere at any price. They can be depended on for good growth and good crops. We offer only those varieties—both old and new—that we know are dependable and profitable. Many kinds, particularly the newer ones, sell early so we urge you not to delay your order.

Aroma —Late

Best For Late-Season Crops

Look over any government report of strawberry production and you will see that growers in those sections where Aroma is widely grown, ship a full crop every season and regularly receive top prices for their Aroma. In spite of many newer late varieties it is still the best and most satisfactory late berry for general commercial planting in all fruit sections. It is a fancy market berry.

A steady producer of big round, deep red glossy berries of excellent eating quality. Tough skin and firm flesh make a splendid shipper. Produces its big crop on any good soil.

AROMA is unusually mild and sweet. A fancy berry in the truest sense of the word, which greatly adds to its marketability at top prices. Steadily growing in favor for the last 15 years; has proved its worth under all conditions. Our guarantee is behind this variety in every respect.

Price—100 for 80c; 1000 for \$4.25

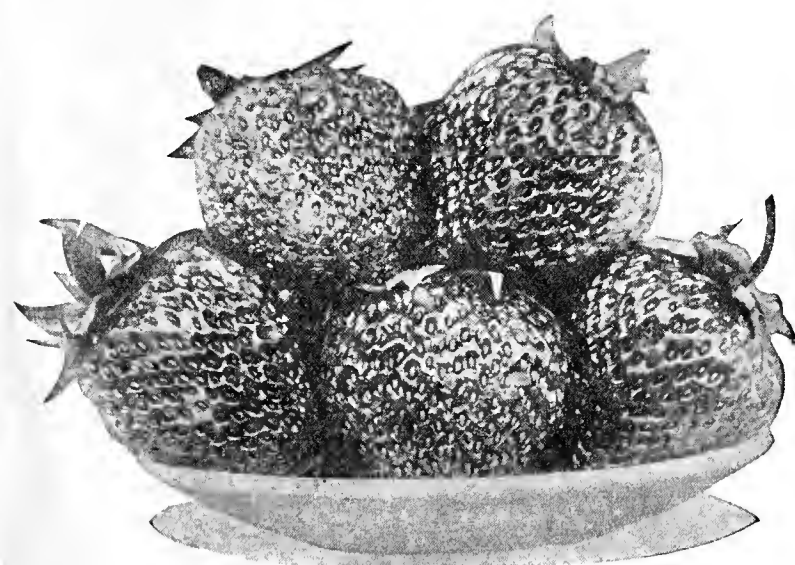

Baldwin's "Lateberry"

Extra-Late High Quality Berry

Here is one of the finest quality berries we know of. Requires rich, fertile sandy loam soil with normal water supply to do its best. Introduced by us in 1930. Read what Mr. Schmits of Indiana wrote us about Lateberry last spring "I bought some of your Lateberry plants and I do not hesitate to say they are the best berry I ever raised. They are furnishing ripe fruit after all others are through bearing. The berries are large and solid and last but not least they are the most delicious berry I have ever raised."

1. Very Late Season—better prices then.
2. Beautiful Appearance—a lasting bright, glossy red.
3. Firmest Berry—a better shipper and keeper.
4. Wonderfully Mild Sweet Flavor—no acid sour here.
5. Every Berry Well Above Average Size.
6. Heavy Regular Bearer.
7. Perfect Blossom—bears when planted alone.
8. Equally Desirable in Home Garden or Commercial Field.

Special Price—100 for 95c; 1000 for \$5.25

Blakemore —Very Early

Exceptionally Productive—An Ideal Shipper

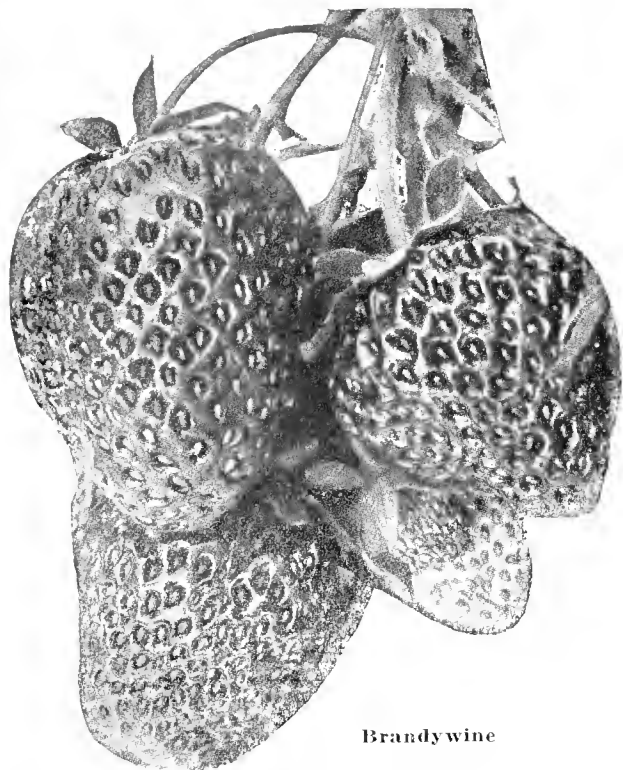

Developed from Premier and Missionary and better than either—it is the coming early berry of outstanding commercial value for general fruit sections in the northern half of the country. One of the firmest berries we know of and its glossy, bright red color does not fade or turn dark when picked. These two facts and its very early season make it a most profitable variety for either local or distant markets.

Firm Bright Red Berries With Real Strawberry Flavor

Unusually good plant maker—much better than Premier in this respect. Berries resemble Premier but are lighter red, as large or larger and have more of a "strawberry" flavor, and therefore better for canning and preserving. Fruit stems are upright, making easy picking. Plants are vigorous, healthy growers. One of the most valuable varieties originated by U. S. Department.

Particularly desirable on locations where it is hard to get a good stand of Premier. Blakemore when kept to a narrow picking row will produce a money making crop of finest berries every time. **PLANT BLAKEMORE NOW!**

Price—100 for 75c; 1000 for \$3.90

Brandywine

STRAWBERRIES

Brandywine

Exceptionally Profitable, Very Late Variety

Answering many requests we are offering Brandywine this year. This older sort has stood the test of time and competition of newer kinds to be recognized as an all-round dependable berry. Experienced growers are finding it one of the most profitable. Ideal for mulching to hold ripening beyond the end of the regular picking season. Produces good results on soils too light for Aroma, and also under irrigation. Brandywine is superior to many new untried sorts and we are glad to be able to supply our customers.

These plants are long rooted, vigorous growing, unaffected by ordinary diseases and pests. Berries are large, somewhat rounded; their firmness, lasting bright red color, semi-tart flavor and late season make them bring top prices.

There is not a large supply of genuine Brandywine plants. Order yours early.

Price—100 for 85c; 1000 for \$4.65

Wayzata Everbearer See Also Front Cover

Facts You Should Know About This Truly Superior Berry

Wayzata does not make many plants but it surely does produce big crops of berries because all its vitality goes into the fruit; making the berries very large, well formed and evenly colored. Each plant has many fruit bearing crowns. More plants can be set on small space and greater crops picked. Exceptionally strong growers on any good rich fruit soil with good moisture supply. Red clear through—no green tips. Wayzata is hardy and frost resistant. Plant in April—begin picking in July—keep picking into October.

Flavor—far superior to other everbearers..

Size—80% of berries as large or larger than the largest Mastodon.

Firmness—good as any June or everbearing berry; ships 500 to 1000 miles by express or truck.

June Crops—really worthwhile, bringing \$1.00 to \$1.50 more per case.

Acre Yield—4 year average—200 24-pint cases and \$800; July to Oct.

Average Price—per 24-pint case \$4.00 to \$5.00.

Braden Bros., of Minnesota have fruited several acres for four years. Their highest yearly return was \$1200 per acre from July to Oct., and the average was \$800. From these statements you can see that here is a really superior berry recommended by both Government Stations and commercial growers. You will want some plants and we urge your early order as we have only a small supply and are making a low price.

Price—12 for \$1.00; 25 for \$1.40; 100 for \$4.00

Everbearing Mastodon

Most Widely Planted Everbearer

Since its introduction several years ago, Mastodon has been increasingly planted in all sections because it has proven its ability to produce good paying crops of unusually large, delicious berries during the late summer and fall under most any soil and weather conditions. Through years of proper selection and propagation, Baldwin's Mastodon today is superior in vitality and productiveness.

3 Full Crops In 18 Months—3 Big Profits

1. Plant this spring.
2. Have fruit 90 days after planting.
3. Pick a FULL CROP through this fall.
4. A second FULL CROP next spring.
5. A third FULL CROP next summer and fall.
6. Big, healthy plants produce in spite of unfavorable conditions.
7. Berries that are "Mastodons" in size.
8. What more should an everbearing strawberry do?

1936 Prices Are Lowest In Our History

Everyone wants and needs a good everbearer that can be depended on to produce plenty of good fruit regularly. Mastodon has shown year after year that it will do this. It is entirely satisfactory for the home garden or commercial patch. Baldwin's Mastodon Plants are grown the right way, guaranteed true-to-name and will do these things for you. This year our price is the lowest it has ever been.

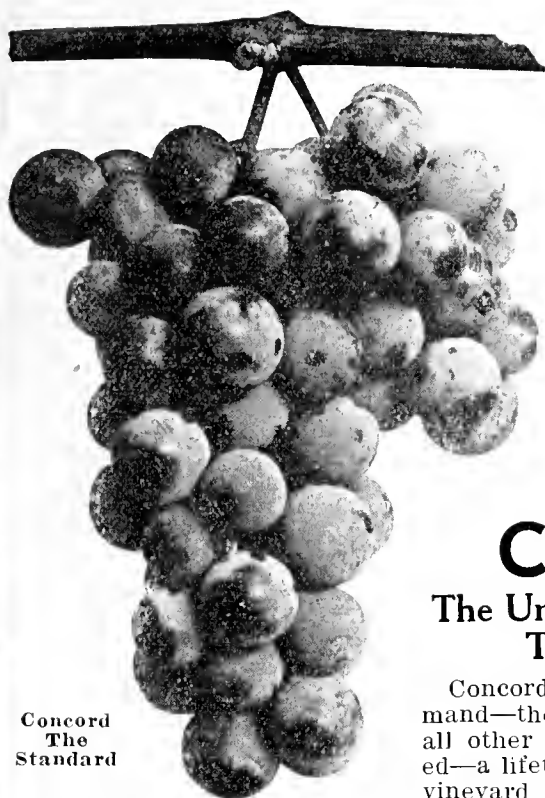

Plant plenty of Mastodon and have good fruit to sell at top prices this summer and Fall. ORDER YOURS TODAY.

PLANT GRAPES NOW

Low Prices For First Grade Vines

With Prohibition repealed, there is a big increase in the grape demand. They are going to bring good prices for a long time. Plant now and be ready to get your share of these higher prices. It is no trouble to grow grapes. Many old vine yards are being pulled out. Now is the wise time to plant.

A Vineyard Started Now Will Last A Lifetime

Michigan vines rank among the finest grown and because of our specially adapted soil and location, you can depend on these of ours. Every one is grown from heavy producing vineyards only so they will bear full crops of No. 1 grapes for you. Really good grape vines are scarce because it requires proper soil, fertilization and grading to produce first grade stock. We are fortunate in having some fine, well-rooted vines. Our supply is not large and if you want to secure good grape vines this spring, order at once.

Concord The Universal Wine and Table Grape

Concord is always in good demand—the standard by which all other black grapes are judged—a lifetime money maker! No vineyard or arbor is complete without Concord.

NOTE THESE FACTS—

Concord produces big crops on any soil every year. After the first expense the cost of upkeep is but little. It is a profitable, permanent investment.

Our scientific methods are recognized by horticulturists as producing vines especially adapted to the central west.

Our Concord vines are well rooted, and guaranteed to reach you in perfect growing condition. Best for market, eating, and all home uses.

Moore's Early Early Black Grape for Profit

A heavy producing early variety. Profitable for commercial growing because it gets the early season high prices. Similar to Concord in appearance and quality, ripening about two weeks earlier. It has a peculiarly sweet flavor that makes it a good table grape along with Worden.

Worden Black Excellent Quality, Early, Very Hardy

Big compact bunches of extra large, thin skinned berries, eating quality superior to Concord but, because of thin skin, not quite so good a shipper. Ripens five to ten days earlier than Concord. Worden is preferred by many because it is hardy, bears heavily and ripens before the main crop.

Niagara [White Grape] Mild, Sweet Juicy

This best known and most popular of all white grapes ranks with Concord in prolific bearing, size and quality. An unusually mild delicious flavor makes Niagara one of the finest table grapes.

Medium compact, large bunches; berries mostly round, of greenish-white color, very juicy and of excellent flavor. Skin is thin but tough and does not crack, making it a fine long-distance shipper.

Delaware Red Delicate Flavor Unsurpassed

Long called the standard of excellence of all grapes as a table delicacy. Bunch small, compact, sometimes shouldered; berries small with skin thin and of unusually sweet flavor. Ripens with Concord. Hardy.

It is impossible to tell you how really delicious these little red grapes are. Don't fail to plant a few vines this spring. Just a little space over the back porch or on a trellis. 5 or 6 vines.

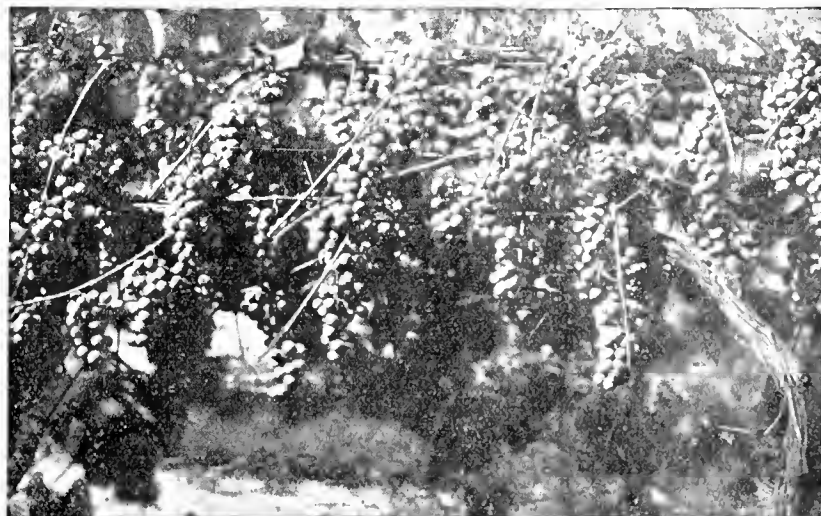

Brighton Red Early, Big, Juicy

One of the finest red grapes. Especially desirable because it ripens early and with its big bunches of deep-red, large and very firm berries is most welcome on the table and sells at fancy prices. Every fruit stand needs Brighton.

New Caco Red Read Why It Is Better

As we do with every fruit, we have waited to offer Caco until certain that it was A-1 in every respect. We give it our unqualified approval. Hardy, quick bearing, produces every year; fruit beautiful, unusually large size, and best of all has a flavor of such sweetness that it is a superior table grape.

Bunch is firm and compact—berries large, clear amber in color. Caco is a most beautiful hardy grape. Always in demand, at grape markets with extra prices. Widely endorsed by experiment stations. Vines just as easy to grow as any other. There is always room for a few vines somewhere. Don't be without Caco.

A Baldwin Concord Vine in Full Bearing

BLACKBERRIES DEWBERRIES

The Three Best Kinds for Home or Market

Did you ever see finer looking berries than those shown here? Blackberries are more popular than ever, but you must grow the right varieties and get the best quality of plants to secure the maximum profits. These varieties, we know, will produce the crops you expect and like our raspberry plants these bushes are Michigan triple-inspected, A-1 stock. You can expect the best results with such a start.

Eldorado Blackberry

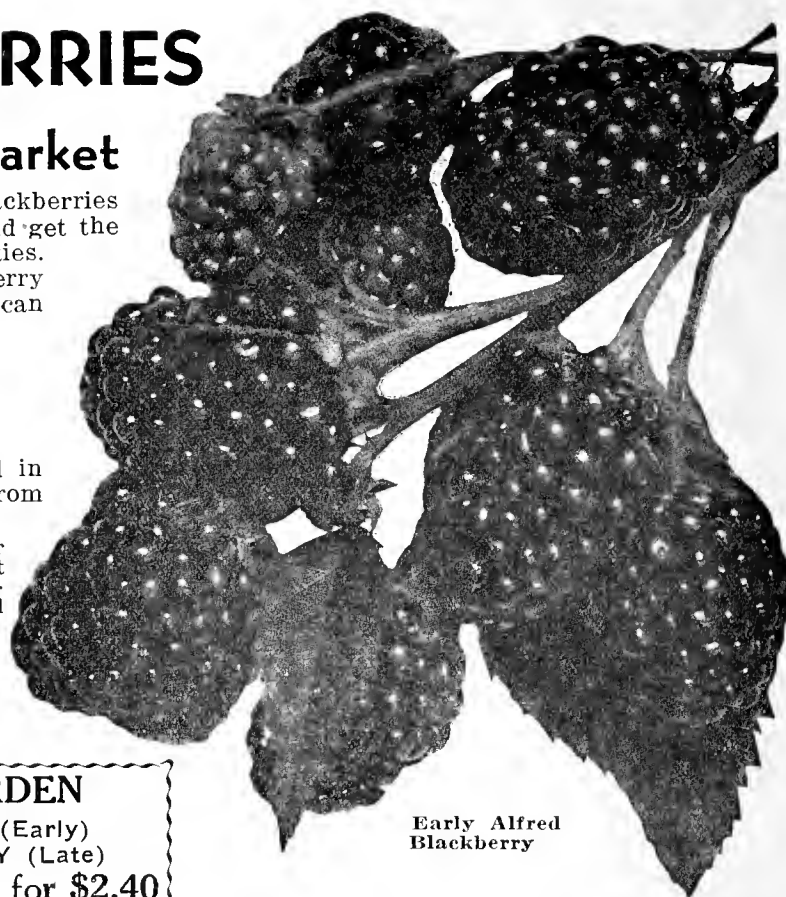

Satisfactory Everywhere—Always Dependable

Every good quality possessed by other blackberries is emphasized in ELDORADO. Its exclusive advantages are: Absolute freedom from Orange Rust; a very heavy bearer with great, jet black berries.

Plants are so strong and vigorous they survive severest Northern Winter without mulching. A splendid shipper because the berries are so firm. Plant Eldorado generously—at least 50 for home gardens or several acres for commercial purposes. They are making big money for other growers and will do the same for you.

Special Price—\$1.40; Two for \$2.40

Early Alfred Blackberry

The Best Blackberry for Every Use

Alfred has been grown by leading fruit growers and proven the Best Early Blackberry variety. We unreservedly recommend it to our customers as thoroughly satisfactory and the equal of any blackberry early or late when it comes to producing big crops and paying worth-while profits. Think of a bush full of tremendously big blackberries from 1½ to 1¾ inches long, practically free from seeds, coreless and with a thick pulp fairly bursting with sweet delicious juice. That's Alfred!

Paying Crops Every Year—Big Juicy, Delicious Berries

Alfred ripens a full 10 days ahead of Eldorado and continues all through the Eldorado season. Alfred berries are bigger, brighter colored, of better flavor and bring better prices right along. Once you grow Alfred you won't be satisfied with any other berry—fine, large berries that carry well to market.

The plant is such a vigorous, healthy grower that it produces a good crop the first year after planting. Withstands cold that kills less hardy varieties.

Alfred will please you—whether raised for pleasure or profit. It is another of our splendid varieties—selected for its worth. Alfred plants are still scarce, but we are making a price within the reach of all, because everyone should have this wonderfully fine berry.

Lucretia Dewberry

Plant Lucretia to Increase Fruit Profits

Coming back in favor because it is profitable. Recognized by fruit growers everywhere as the most profitable, finest quality Dewberry. Incomparably better in size and flavor than any blackberry you have seen or tasted. Several times more Dewberries than blackberries were sold on the Benton Harbor, Michigan, Wholesale Fruit Market during the 1935 season. The price the grower received for dewberries averaged 20% more than for blackberries. You can see that it will pay to raise Lucretia.

Ripens 7 to 10 Days Before Most Blackberries

Ripens a week to ten days before the earliest ordinary blackberries. This, and the fact that they are unquestionably the finest looking berry of their kind and of such big, uniform size, makes them topnotchers on price in any market. Dewberries are especially productive in light soils. Plant Lucretia and such land will make you a profit. 1-Yr. No.1—100 for \$1.90; 1000 for \$12.50 2-Yr. Transplants—25 for 95c; 100 for \$2.95

Lucretia Dewberry

BLACK RASPBERRIES

ALWAYS DEPENDABLE—ALWAYS PROFITABLE

There are 8 to 10 different kinds of blackraspberries grown for market. All cannot be the best. Tests for both vigorousness of growth and quantity and quality of fruit production have proven that the varieties listed here are the very best of their seasons and we are offering only these to you. The New Logan for early; the old reliable Cumberland for mid-season and main crop; and Quillen for a fancy, fine quality late berry.

New Logan —Early

By Far the Best Extra Early Berry

This is the early variety growers have been looking for. It has all the good points other early berries have lacked. Its berries are good size, do not crumble (unusually firm), do not dry up, hold a glossy black color and have a deliciously sweet flavor. Logan is a fine home garden berry. Bears heavily, maturing most of its crop before Cumberland begins and so gets the best of the early high prices. Many Michigan canning companies are contracting Logan because they like its rich flavor and uniform berries.

Ripens 6 to 9 Days Before Cumberland

Logan is recommended by Michigan and Ohio Experiment Stations. It has proven to be an entirely satisfactory commercial berry in the great fruit sections of these states. It is remarkably free from and resistant to disease; a strong grower, throwing out plenty of fruit canes.

We recommend Logan for its earliness, its excellent quality, its firmness and color for market. Be sure to plant this spring. You will be well repaid. Our price is low for this New Early Blackraspberry.

Prices—100 for \$2.00; 1000 for \$12.95

Everywhere

Cumberland —Mid-Season

Still the Leading Commercial Variety

Clear money above all expense is what you want and you can depend on Baldwin's heavy producing, vigorous plants to do it. Cumberland is still the leading berry in the plantings of commercial fruit growers everywhere. Government Experiment Stations have found none that promise to be a better money maker.

Low Prices for Dependable Certified Plants

Plants vigorous and very productive; thrive everywhere. Berries large, firm, jet black with a delicious flavor. Wonderful long distance shippers—attractive appearance—always command good prices. Guaranteed to please you and make big money.

Michigan grown, triple inspected Raspberry Plants are recognized throughout the country as the best. Our soil is especially adapted to produce sturdy, well rooted, quick growing plants.

Prices—100 for \$1.70; 1000 for \$10.75

Quillen —Late

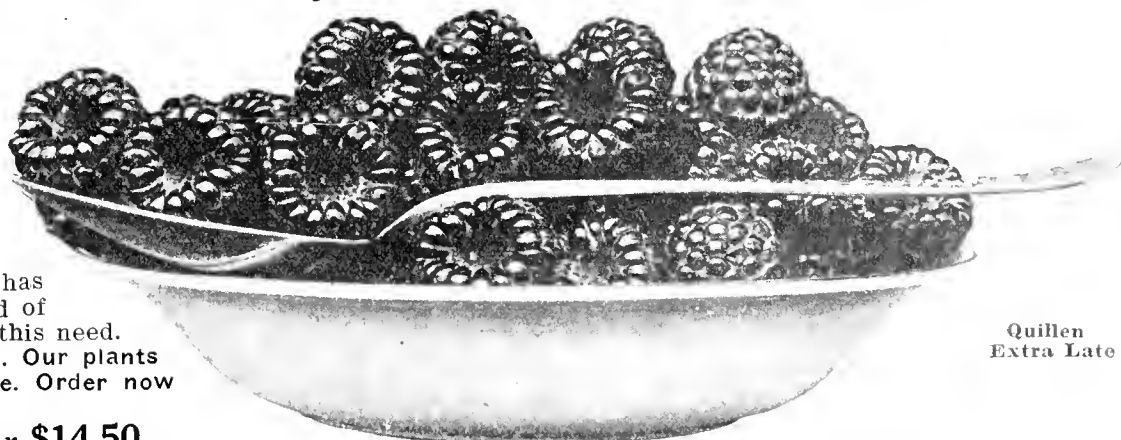

Heavy Bearing—Profitable—Disease Proof

Here is a remarkable new late variety that seems about perfect in every way. It appears to be almost disease proof—having grown and produced good crops alongside other varieties that were being killed out. An unusually strong healthy grower, producing plenty of fruit canes and therefore a big crop of very large glossy berries. In size berries exceed Cumberland and are exceptionally large, and of good shipping quality.

**You Need Quillen for Late
Season Profits**

A heavy bearing, real late raspberry has been needed to bring good crops at the end of the season when prices go up. Quillen fills this need. We recommend it as the best late variety. Our plants came from the introducer and are genuine. Order now while we have them.

Prices—100 for \$2.20; 1000 for \$14.50

Quillen
Extra Late

Bearing Age Transplants

Will Bear Fruit This Summer and Save A Year*

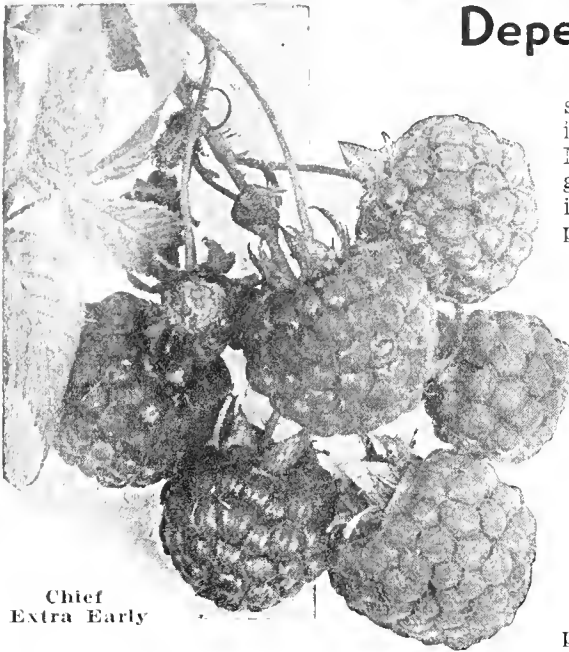

These are large, branched, 2-year old bushes, carefully dug and will go right to work for you. Fine for the home garden, too, so don't fail to plant 25 or 50 and have fruit quickly.

BALDWIN'S RED RASPBERRIES

Dependable Certified Plants That Make Money

Chief
Extra Early

IMPORTANT NOTICE

Michigan Triple Inspection
Means Full Protection for you

Beginning this year Michigan State Inspectors inspect all Michigan stock three times. Two field inspections have always been made during the growing season. This year a third will be made in the packing house to be certain that everything, particularly the root is in A-1 shape for your planting. This is another reason why Michigan nursery stock is better.

Good disease-free, healthy stock is needed by growers in the central and eastern states to compete profitably with Pacific Coast fruit. Many of the older raspberry fields in these sections are not now producing a full crop and need replacing. Berrien County, Michigan, is recognized as having the most healthy, most vigorous raspberry plants grown and every Baldwin plant is triple inspected and certified by Michigan State inspectors. This means success to the grower because a plant "sick" with disease or poorly grown will never produce a full crop.

Red and Black Raspberries Continue Fruit Profits

The right varieties begin to give you a paying crop just after strawberries are gone. They are demanded for table and canning everywhere. These varieties are the best and our plants are right—plant this spring. You can depend on raspberries as a paying investment.

Chief

Best Early Red Raspberry

Chief is replacing King and other early kinds because it is better. Chief is paying Michigan growers well. Berries are of good size and color and firm and reach the market in good shape for early-season high prices. Perfectly hardy, a vigorous grower and heavy producer—Chief will make good anywhere.

Originated by the Minnesota State Breeding Farm, Chief has been fully tested both for home or commercial use and has proven itself a superior early berry. As good an early berry as Latham is a late one. The Minnesota breeders say Chief—(1) ripens 7 to 10 days earlier than Latham; (2) yields heavier; (3) is a hardier more vigorous grower; (4) is equal to it in quality and as a shipper; (5) is almost free of Mosaic, etc.; (6) is the best early variety yet tested.

Chief's Early Crops Bring Big Profits

Chief plants received from us are guaranteed true-to-name and No. 1 in every respect. Early red raspberries always pay well and with Chief you can depend on some extra profits. It has been a long time since we offered a red raspberry we think so much of as Chief, and we gladly recommend it to you as better than any other early red sort and one that will pay you well.

Price—100 for \$2.00; 1000 for \$12.95

Viking

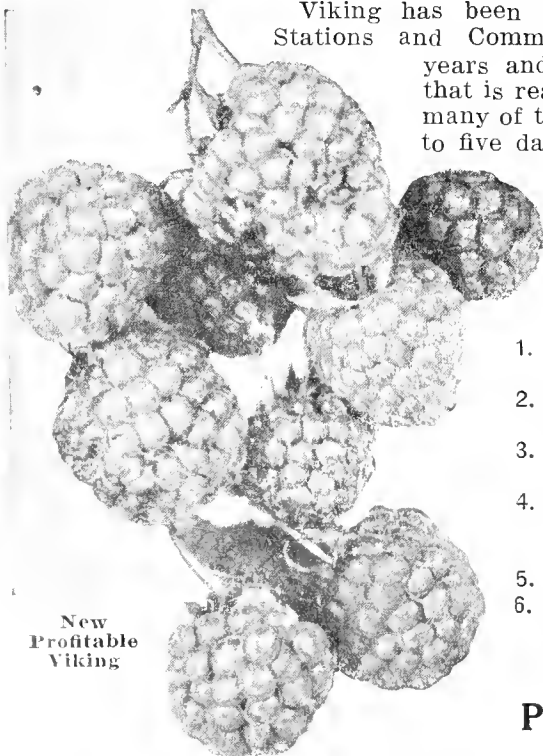

Excellent New Raspberry—We Recommend It

Viking has been grown both by Experiment Stations and Commercial growers for several years and has proven a new variety that is really better in every way than many of the older sorts. It ripens three to five days before Latham. Viking is recommended by the Michigan Expt. Station as a variety of real value both for home use and market.

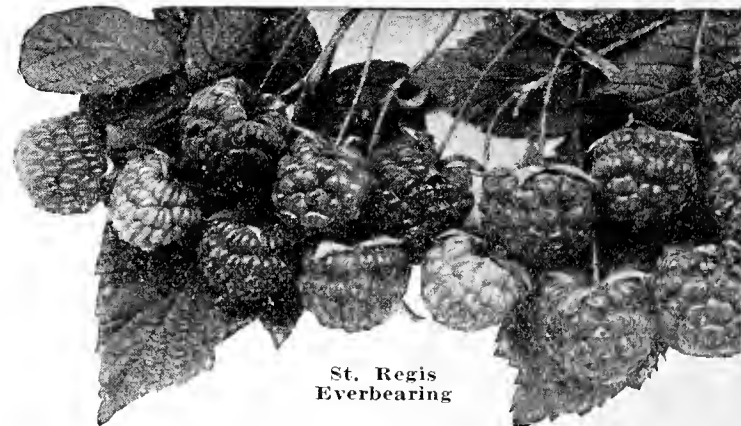

Viking Will Pay You Well

1. Perfectly hardy—originated in Canada.
2. Practically free from all diseases vigorous grower.
3. Heavy bearer — outyields Cuthbert.
4. Fruit — round, very large, very firm, retains bright red color after picking.
5. Quality—equal to Cuthbert.
6. Best prices certain—because of its big crops, big size, better appearance and fine quality.

Price—100 for \$2.15;
1000 for \$13.95

St. Regis
Everbearing

St. Regis Everbearing

Just think of having delicious, ripe red raspberries from your own garden through August and September long after other berries are gone. That's what you get with St. Regis. They are mighty profitable to sell then, too, because premium prices of \$4.00 to \$5.00 for a 24 pint case are not uncommon for these fine out-of-season berries.

Bearing Through Summer Into Fall

Of all everbearing varieties St. Regis is by far the best. Bushes are good size, upright, vigorous and remarkably free from disease. St. Regis produces a full spring crop as well.

Every garden should have enough St. Regis to supply the table.

Price—25 for 80c; 100 for \$2.30

Latham —Late

World's Most Profitable Red Raspberry

We said this in 1929 and we are saying it again today because Latham has definitely proved to be the best red raspberry moneymaker in every fruit section of the country. Each year for the past three years we sold more Latham plants than all other red varieties put together.

For general planting in all sections, Latham is the best because this hardy, vigorous grower can be depended upon for big annual crops of finest looking berries. Fruit buyers on every market pay a premium for Latham's bright color, firmness and long keeping quality. These things and its most delicious flavor make it equally desirable for home gardens. This proves how satisfactory and profitable it is.

Plant Latham for Bigger Crops and More Money

Hardy and very productive—far outyielding older kinds. We wish we could convince you what a truly fine berry LATHAM is in every way. You will make no mistake in planting all you can. The supply of plants is not large and we sincerely hope you will order now so we can reserve what you want.

FOR CANNING—Jams and Jellies— Unusually rich color that does not fade, and what a wonderfully delicious, true, fresh raspberry flavor!

GOVERNMENT EXPERIMENT STATIONS—Recent reports from leading fruit states say that Latham is the best and most profitable berry for its season and highly recommend it for planting.

Baldwin's Guaranteed, Disease-free, Genuine LATHAM.

Lower 1936 Price—100 for \$2.15; 1000 for \$13.95

Big Bearing Age Transplants Save A Year

Our transplants are big, well-branched, strong growing, 2 year old bushes. They will give you some fruit this summer and practically a full crop next summer.

Because of sure growth and quick crops, transplants should be planted in every garden. We have a limited number of first-grade plants in the following varieties:

CHIEF LATHAM VIKING NEWBURGH ST. REGIS

25 LATHAM

25 CUMBERLAND

Special Price—\$2.32; Two for \$3.84

Newburgh —Medium

A New Variety of Exceptional Merit

Of all the new red raspberries, Newburgh is the most promising to become a leading variety. The berries are very large—probably larger than any other red, very firm, of good flavor, do not crumble, and are a bright attractive red. Because even young plants make many branches it bears a full crop quickly. Bushes are hardy, vigorous growers, unusually resistant to mosaic.

Set A Good Trial Planting This Spring

Newburgh was originated by the N. Y. State Experiment station and has been widely tested. The N. Y. Fruit Testing Assn. says it is the best variety now grown in New York State. Reports from all sections generally find it proving all that is claimed for it. Ripens five days before Latham, is more hardy, is of better keeping and shipping qualities, and is of better flavor. Price on our small supply of genuine Newburgh is low and we hope every raspberry grower will make at least a good trial planting now.

New Low Price—25 for \$1.15; 100 for \$3.50

Early King —Gets High Early Prices

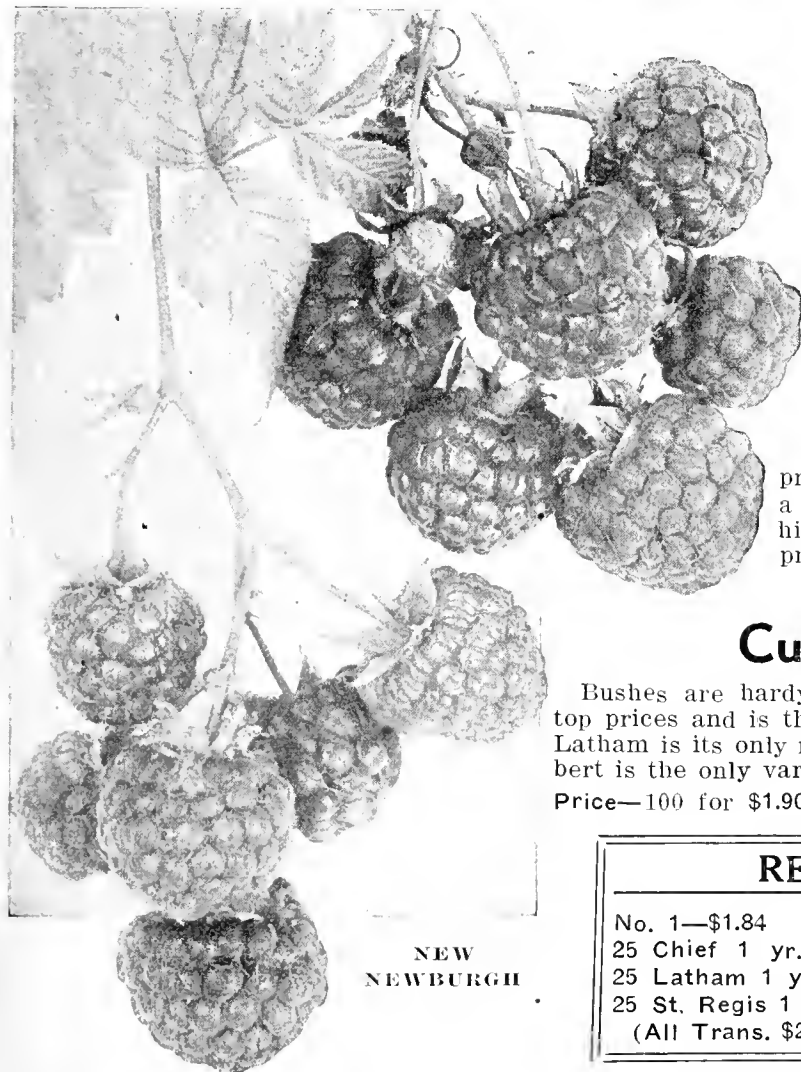

For big, early returns we recommend KING RED, one of the most profitable Red Raspberries you can plant. Easy to pick. Ripens about a week or ten days ahead of other varieties and for this reason is highly profitable. It is a good shipper and can be marketed when prices are highest.

Price—100 for \$1.90; 1000 for \$11.95

Cuthbert —Late—The Standard for Years

Bushes are hardy, vigorous and productive. Season is late. Cuthbert always brings top prices and is the standard of good quality. For canning Cuthbert is hard to beat—Latham is its only rival. Holds its color and shape. The flavor is delicious. In fact Cuthbert is the only variety used by many largest commercial canners.

Price—100 for \$1.90; 100 for \$11.95

BALDWIN'S FRUIT TREES

FIRST GRADE TREES—BEST VARIETIES—LOW PRICES

Buy Baldwin guaranteed true-to-name varieties. Then you cannot go wrong. These are high-quality, proven-value varieties best adapted to eastern, middle-western and northern soils and climates. Our thousands of regular satisfied customers are the best evidence you can ask for when buying fruit trees. There is real pleasure and a big saving in having two or three trees of each kind of fruit right in your garden. As a commercial proposition, tree fruit is always in profitable demand.

Right Grading Is Important to You

Trees may be graded either by caliper or by height. Ours are carefully graded by both measurements—because we want you to have trees that are not "short" either in height or in sturdiness. This insures trees of good height yet not spindly. Every tree we ship has good sturdy trunk and root system capable of carrying it to full growth. We sell direct from nursery to you. You will be satisfied with Baldwin trees.

Apples

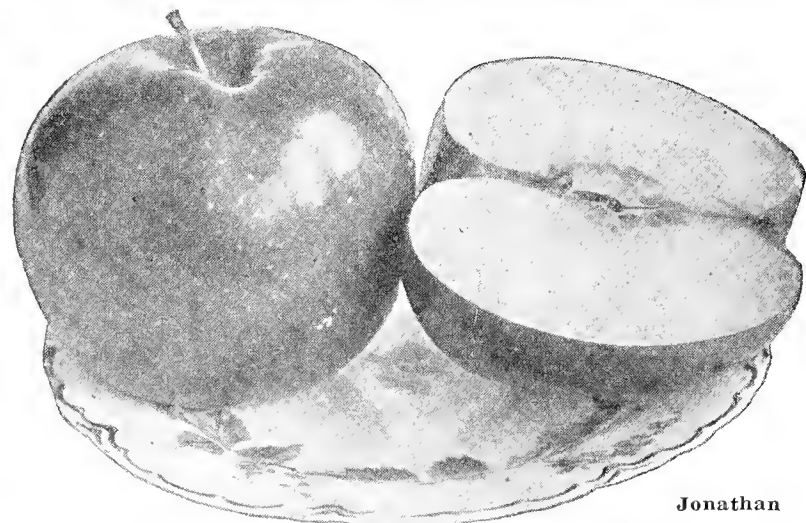

Baldwin—Winter. This widely known variety averages above medium size, rich dark, red, juicy, fine flavor. Good for market and home use. One of the first two of three varieties in the great Michigan and New York apple sections.

Cortland—Winter. Many customers have asked us for this newer apple and we are glad to supply them. Cortland is an excellent, early bearing, long keeping, good quality apple of McIntosh type. Large fruit streaked with brighter red and yellow. One of the best commercial sorts.

Delicious—Winter. Known the World Over. Brilliant dark red, shading to yellow at blossom end. Large to very large; white tender juicy flesh. Wonderfully rich sub-acid flavor—truly delicious. Ships without bruising, makes a wonderful appearance, commanding top prices. Comes into bearing early.

Grimes Golden—Winter. Favorite mild eating apple. Excellent keeper, uniform shape, typical dull gold color. Hardy, productive tree. Carefully selected and grafted trees insure entire satisfaction with this fine apple.

Jonathan—Late Fall. Sold in Every Store. Glossy red; fine grained, juicy flesh, excellent flavor. Medium to large size. Unusual keeping quality (to February) makes it a most profitable commercial apple. Quick to bear and easily grown in practically every fruit section. Jonathan is first choice in many homes.

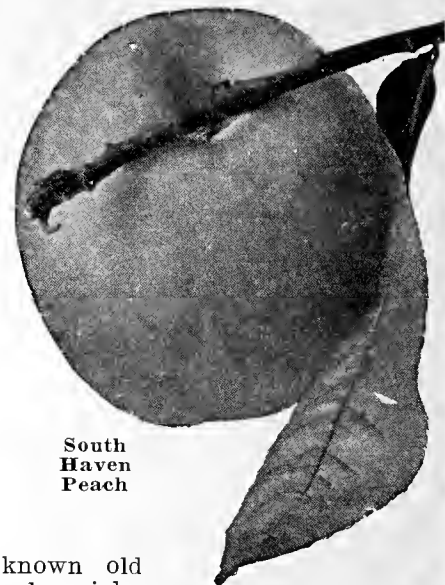

Jonathan

McIntosh—Winter. A Money-Maker Today. Juicy snow apple—white, crisp flesh; beautiful solid crimson color. Excellent quality—wine-like, true apple flavor. Good annual bearer. Rapidly increasing popularity among consumers everywhere makes good prices certain. One of the most profitable apples today.

Northern Spy—Winter. The old, well-known favorite. Delicious spicy flavor; excellent for eating and cooking. Brilliant streaked red color. Always in demand; good prices; long keeper.

Rhode Island Greening—Winter. Excellent keeper. Large, greenish, yellow, crisp and juicy. Best yellow winter apple; fine for eating or cooking. Strong grower, heavy yielder; long lived.

South
Haven
Peach

Red Astrachan—

Best Early Summer. Well known old sort. Large round, crimson apple; rich juicy, excellent eating and cooking early apple. Vigorous and productive tree.

Stayman's Winsap—Late Winter. Best Winesap Extra large, bright red, crisp, juicy with a wonderful zestful flavor. Stayman easily leads all other Winesaps. Heavy bearers and big money makers everywhere.

Wagener—Winter. Good sized red apple. Unusually good keeper. Most excellent flavor—firm, crisp, juicy. Tree rapid up-right grower; early heavy bearing. One of the best varieties.

Wealthy—Fall. Heavy yearly bearer. Hardy, long lived. Attractive brilliant red striped; superb quality, wine-like flavor. An all-round apple for eating, cooking, cider and market.

Yellow Transparent—Early Fall. Has proven both popular and profitable. Fruit large, yellow with crisp sub-acid flavor. Heavy annual bearer; well known everywhere.

Hyslop Crab—Recognized as the best of all crabapples. Its hardy, quick growing tree comes into bearing early. Strong, disease-resistant. Always a heavy annual bearer. Fruit beautiful deep red; firm, juicy, uniform—sells well. Excellent for home use.

YELLOW DELICIOUS

This beautiful new apple has the distinctive shape and big size of Red Delicious, and also an added deliciousness and mildness of flavor that is unsurpassed by any apple. Flesh solid, crisp and full of juice; its rich, golden-yellow, firm smooth skin gives it a luscious appearance. This new, highest quality apple is always in demand and brings top prices. PRICE—Each 69c; 3 for \$1.95; 10 for \$6.45

Pears

Bartlett—Summer. Known for Quality. One of the best known and popular varieties for both commercial and home orchard planting. Golden color with red streak, mellow and indescribably delicious both fresh and canned. Produces enormous crops; bears early. If picked before ripe will keep until late.

Buerre Bosc—Fall. Big, deep yellow, long shaped pear. Unusually sweet and juicy. Sells well; profitable. Good keeper into December. Excellent home orchard variety, grows vigorously yields heavily.

Clapp's Favorite—Summer. Ripens August 1st. A seedling of Bartlett but earlier ripening; somewhat larger; lemon-yellow; of very good eating quality.

Kieffer—Fall. Best pear for large commercial planting, because of its sure crop, heavy yield and excellent shipping qualities. Kieffer has been proven unexcelled for commercial canning. A local cannery used over 200,000 bushels in one season.

Seckel—Early Fall. A medium sized pear that ripens late in September. Extremely fine quality and flavor. Always in market demand and equally valuable for home use.

Quince

ORANGE—BEST of all quinces. Regular annual bearer of fine, large, delicious, juicy fruit, Hardy, early bearing trees. PRICE—2-yr. 3½ to 4½ ft. trees, each 72c; 3 for \$2.15

Peaches

Champion—Early August. Best White Freestone. Many prefer this white peach. Full of rich juice, finest flavor. Large, white with red check. Heavy bearer; very hardy.

Early Crawford—Early Sept. Widely planted; large size, well colored; good flavor. Freestone, good canning and market variety.

Early Elberta—August 15 to 20. Somewhat larger and firmer than Elberta, otherwise the same except it ripens 7 to 10 days earlier and brings Elberta prices sooner.

Elberta—September 1. Planted by Thousands. Large to extra large. Freestone. Golden yellow flesh, red at the pit, firm, juicy. Has no equal as a prolific bearer and shipper. Best known peach.

Gold Drop—Late September. Excellent late, well known peach much in demand. Good annual crops of firm, juicy, yellow, medium sized fruits.

J. H. Hale—Late August. First in Size, Color and Quality. Yellow, thick skin, colors to a rosey tint. Deep yellow, fine grained, very firm flesh—delicious flavor. A beautiful peach, fresh or canned. In size, color and quality, no peach compares with J. H. Hale. Always brings \$1.00 to \$1.50 more per bushel.

South Haven—August. The Profitable Early Peach. Originated in the famous Michigan Peach Belt, South Haven, has proven one of the best varieties in every peach growing section. Experiment stations recommend it when an earlier peach than Elberta is desired. Very hardy variety standing several winter cold. As fine a peach as the standard Elberta, firm, highly colored—and ripens 12 to 18 days earlier. Each 49c; 3 for \$1.40; 10 for \$4.45; 50 for \$19.95.

Two Better Early Peaches

GOLDEN JUBILEE—Early August. Ripens with Rochester but is larger, firmer, and has a delicious sweet flavor; not quite so hardy. Elberta type peach and ships better than most early kinds. Profitable, extra early peach.

HALEHAVEN—Mid-August. Wonderful new peach with great size and beautiful color of J. H. Hale, and earliness of South Haven. Better shipper than South Haven; always freestone. Halehaven is one of the best.

Price—Golden Jubilee and Halehaven—1 yr., 3½ to 4½ ft. trees. Each 54c; 3 for \$1.55; 10 for \$4.95

Sour Cherries

Early Richmond

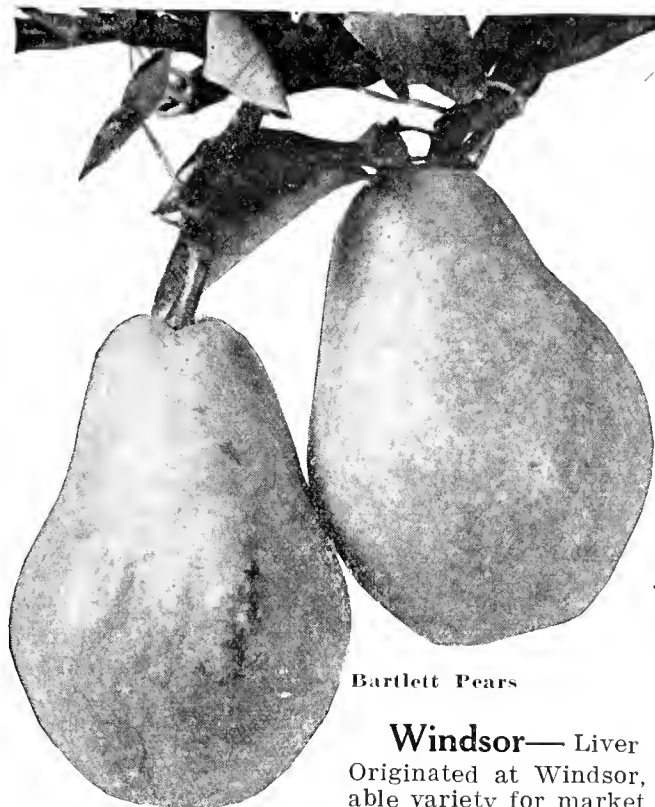

One of the most popular sour cherries, unexcelled for cooking. Dark red, tart and juicy. Hardy trees uninjured by cold. Big crops.

Montmorency

Ripens late in June and is best sour cherry for the market. Makes delicious pies; fine for canning. Fruit larger than Richmond; bright red, acid flavor.

Grow Montmorency for the canning factory market.

Schmidt's Bigarreau Sweet Cherry

Bartlett Pears

Sweet Cherries

Bing—Sweet. Large, firm black cherry. Splendid shipper. Hardy tree; upright grower. Ripens middle of June.

Black Tartarian—Extensively planted and prolific. Regular bearer of big, black, juicy, sweet fruit. Hardy, vigorous. Best and most profitable black sweet cherry—for market, cooking, canning.

Napoleon-Yellow—Old-time favorite, succeeds practically everywhere. Heavy bearer of large, light yellow, heart-shaped fruit.

Schmidt's Bigarreau—Newer sort. Unusually hardy. One of the best late sorts, especially in Northern sections. Largest size, firm fruit; deep red to mahogany. Brings best prices.

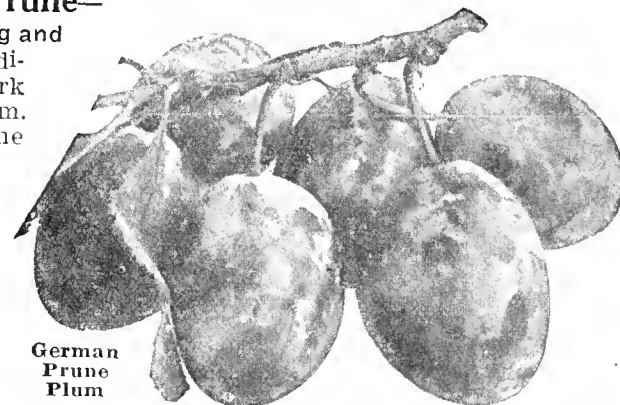

Windsor—Liver colored, large cherry, wonderful flavor. Originated at Windsor, Canada. Hardy prolific tree. Most valuable variety for market or family use.

Plums

Burbank—Delicious Table Plum. A strong hardy Japanese variety. Practically curculio-proof and free from black knot. Deep red color, unusually delicious flavor. Keeps three weeks, after ripening. Trees bear in three to four years. Ripens August 15 to Sept. 1.

German Prune

Best for Canning and Preserving. Medium, sized, dark purple plum. Firm, sweet, the favorite everywhere for canning. Tree easy to grow, remarkably free from disease, very productive. Good keeper, excellent shipper. Ripens in Sept.

German Prune Plum

Monarch—Widely Grown and Profitable. This strong tree is a heavy bearer of finest plums. Very large, entirely freestone, dark purple blue color, splendid flavor and quality. Ripens in October. Brings fancy market prices. None better for home use—fresh, jelly or canned.

Yellow Egg—Best Yellow Plum. Extra Large Fruit. Clear yellow egg shaped. Fine for table or canning use. Hardy productive tree. Ripens August.

BALDWIN'S BEST SHRUBS - Plant Now at Lower Prices!

ALL SHRUBS LARGE, WELL ROOTED—1½ TO 2 FOOT BUSHES

ALTHEA—Rose of Sharon. Beautiful deep pink flowers; dark green glossy foliage. Great masses of large flowers 3 inches across in August and September when there are few other flowers. Hardy; succeeds anywhere. Grows to 4-6 feet.

Mock Orange, Virg.

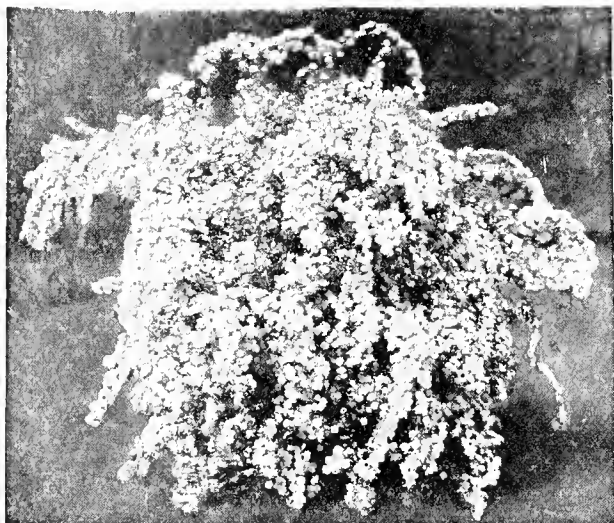

BARBERRY—Japanese. For Every Purpose. Where a beautiful foliage effect is desired there is no shrub so generally planted or more practical for all purposes. Dwarf growing, bushy and rounded in form. Of special importance for use as a filler, and edging for shrubbery groups, and above all as a compact, low hedge for lawn borders. In autumn the foliage turns scarlet and gold covered with crimson berries.

BARBERRY—New Red-leaved. Similar in all respects and for all uses to the green-leaved Japanese Barberry, except that the foliage of this new variety is a rich, lustrous, bronzy red. Brilliant, scarlet berries remain all winter. Plant in full exposure to the sun.

Each 30c; 3 for 85c; 12 for \$3.00

BECHTEL'S FLOWERING CRAB—A flowering tree of outstanding beauty. Large, apple-pink, double, fragrant blossoms. Adapted to single plantings—grows 8 to 10 feet. Slow growing, long lived ornamental tree.

Each 45c; 3 for \$1.20; 12 for \$4.50

Spirea V. H.

HYDRANGEA P. G.—This showy shrub is perfectly hardy. Large clusters of pure white blossom, later turning soft pink, from August to late fall. Superb either singly or in groups; often used as a hedge. 4 to 6 feet.

HYDRANGA A. G.—Hills of Snow. Pure white flower clusters. One of the finest mid-summer bloomers. Deep green foliage covered with a mass of white make it truly a "Hill of Snow." Grows only 2 to 4 feet high.

JAPANESE OR FLOWERING QUINCE—Scarlet flowers—6 to 8 feet. Blooms April and May. A most attractive spring blooming shrub; blooms always large, produced in great masses just as the leaves are coming out. Dark, glossy green foliage.

Price—Each 35c; 3 for 95c; 12 for \$3.15

MOCK ORANGE—P. CORONARIUS—A favorite large, very hardy shrub with a profusion of pure white, highly scented flowers, in June. Grows 4 to 6 feet. Always does well in any location.

Price—Each 15c; 3 for 40c; 12 for \$1.50

BUTTERFLY BUSH—A beautiful medium size shrub that bears clusters of lilac-colored flowers, 5 to 6 inches long. Attracts butterflies in large numbers. Blooms early Summer until late Fall.

DEUTZIA—Pride of Rochester. The large double white flowers, reverse side of petals of delicate pink, make this a most highly prized shrub. Grows 6 to 8 feet high. This Deutzia deserves a much wider use. Blooms June-July.

Price—Each 15c; 3 for 40c; 12 for \$1.50

FORSYTHIA FORTUNEI—Golden Bell Earliest shrub to bloom. Bright yellow flowers seem the spirit of Spring, opening before the leaves appear. Grows to 6 to 8 feet but may be pruned as desired. Branches slightly drooping. Dark green leaves.

Price—Each 15c; 3 for 40c; 12 for \$1.50

HONEY SUCKLE BUSH—Pink Tartarian. This vigorous spreading shrub with dark green foliage bears bright pink flowers in June, followed by crimson berries. Very showy. Height, 6 to 10 feet.

Price—Each 15c; 3 for 40c; 12 for \$1.50

PRIVET HEDGE—Amoor River North—Ideal hedge plant for general use. Absolutely hardy in all northern states. Dark green leaves do not fall until late fall. Very rapid grower and readily trimmed to any desired shape. Set about one foot apart. Price—6 for 40c; 12 for 70c; 25 for \$1.45; 100 for \$5.00

SPIREA ANTHONY WATERER—Dwarf hardy shrub; large pink-red flowers 3 inches across. Blooms July to frost. Rarely reaches over 3 feet.

SPIREA VAN HOUTEI—Bridal Wreath. One of the most beautiful and popular of flowering shrubs. Snowy blooms in May and June. Thrives anywhere, in shade or sun, wet or dry, and grows from 6 to 8 feet high. Beautiful for ornamental hedge.

Price—Each 15c; 3 for 40c; 12 for \$1.25; 25 for \$1.95

RED SNOWBERRY OR CORALBERRY—Desirable for its clusters of red berries, hanging on all winter. Low growing, graceful, spreading habit. Attractive foliage; sturdy grower in shade.

WHITESNOWBERRY—Soft, green foliage and graceful sprays of large, milk-white berries coming in mid-summer and lasting into winter make this a most attractive ornamental shrub, 4 to 5 feet.

WEIGELA ROSEA—Pink, 4 to 5 feet. The most popular Weigela. Delicate pink, bell shaped blossoms borne in profusion along arching canes, during May and June. Best Weigela and is good for all use where a shrub of this height is needed.

PRICES ON ALL SHRUBS—(Except as Noted)

Each 25c; 3 for 70c; 6 for \$1.30; 12 for \$2.40

Climbing Vines

AMERICAN BITTERSWEET—A native ornamental vine. Brilliant green leaves, followed by big green berries, bursting to yellow and scarlet clusters with frost and remaining all winter. Hardy, rapid twining grower.

CLEMATIS PANICULATA—White. The small, white "star" variety that blooms so profusely in later summer. Delicately fragrant. Attractive light green foliage. A hardy grower—one of the most satisfactory flowering vines.

CLEMATIS JACKMANI—Purple. The most strikingly beautiful Clematis. Large, open, deep purple flowers cover the vine in July and August. Deep green glossy foliage.

HONEYSUCKLE, HALL'S JAPANESE—The favorite. Delicate white and yellow flowers blooming in June, with some flowers all summer. Heavy pungent fragrance. Dark green foliage holding its full color late into the fall. A vigorous grower, often shooting 7 to 10 feet in a single season.

IVY, BOSTON—Well known hardy vine covering for brick and stone walls—nothing better. Foliage small, dense, close-growing. Brilliant fall colorings. Ideal fireplace, chimney covering.

WISTERIA—Chinese Purple. A luxuriant, growing, clinging vine. Beautiful, fine, lacy foliage filled with long, drooping clusters of soft, purple flowers, that come in May. A long-lived, hardy vine.

PRICE—2-Yr., No. 1 Vines	Each	3	6
American Bittersweet	\$0.29	\$0.77	\$1.49
Clematis Jackmani	.71	1.94	3.59
Clematis Paniculata	.29	.77	1.49

Ivy, Boston	.31	.92	1.74
Wisteria, Chinese Purple	.34	.92	1.74

FREE—A RAMBLING ROSE

With every order of shrubs or roses of \$3.00 or more, we will include FREE of charge a Pink Dorothy Perkins rose bush.

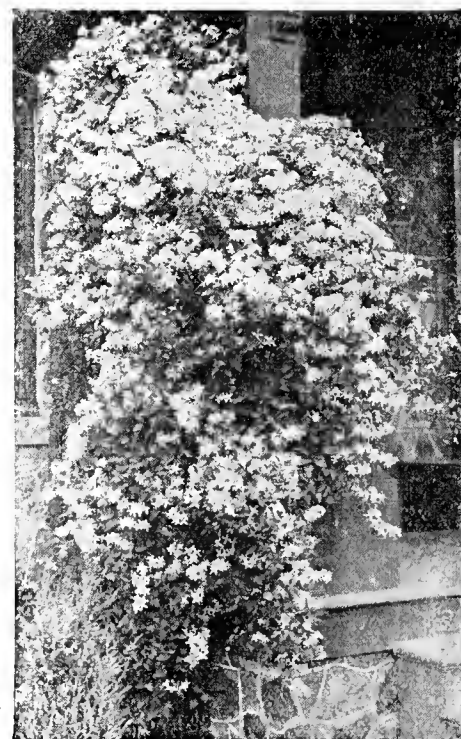

DOGWOOD—C. Siberia. Bright red branches and berries make it attractive in winter. A valuable shrub because it grows vigorously in shade. Large leaved foliage makes a good show in summer and fall. 6 to 10 feet.

FLOWERING ALMOND—Rose-pink flowering—3 to 4-foot, upright flower. A very attractive shrub. The long branches are thickly studded with small, double, delicate pink flowers over their full length, before the leaves appear. Blooms in April.

Price—Each 35c; 3 for 95c; 12 for \$3.45

MOCK ORANGE—P. Virginialis. Magnificent New Variety. Medium height, compact bush. The flowers (single, semi-double and fully double) are the largest and most sweetly fragrant of any variety, with longest early blooming season. Gaining popularity in every state.

WEIGELA EVA RATHKE—Crimson, 3½ feet. June flowering. A smaller growing Weigela. Decidedly spreading. Profusion of brilliant crimson flowers, white throated, is its outstanding characteristic.

Clematis Paniculata

Baldwin's Best Hardy Roses

2-Yr. Field Grown--Bloom This Summer--Low Prices

NO GARDEN IS COMPLETE WITHOUT BEAUTIFUL ROSES. Here are 17 varieties offering you the best of both old and new favorites to choose from. Make your selection now. All 2-year, strong bushes.

BEST NEWER ROSES

OLYMPIAD—Vivid Scarlet and Yellow. A gorgeous new rose. Deep warm scarlet with golden splashes at the base of long petals. Beautifully shaped long compact flowers, with a soft velvety sheen making them especially outstanding. Long stemmed; monthly bloomer.

DAME EDITH HELEN—New Pink. The supreme everblooming pink rose. Large, full double pink blooms. Long stemmed, heavy bloomer. Unusually full of fragrance. Plenty of finest flowers all summer, in the garden or for bouquets.

E. G. HILL—Scarlet to Deep Red. Excellet newer red rose. Long scarlet buds opening to deeper red, large double flowers. Vigorous grower; free bloomer.

ETOILE de HOLLAND—Deep Crimson. Hardy strong steady bloomer. Unusually large brilliant flowers that do not fade. One of the finest red roses and should be in every garden.

GOLDEN DAWN—Copper Yellow. One of the finest deep yellow roses. Beautiful coppery buds opening to pure yellow golden blooms. Luxuriant foliage makes an attractive bush. Golden Dawn stands out.

TALISMAN—Orange Red. Magnificent in color. Brilliant orange red buds, long and beautifully formed. open to a large fragrant double bloom of glowing yellow, stained with cooper and rose. We have a limited number of genuine Talisman.

Prices On Above Varieties

Each 55c; Any 3 for \$1.40; Any 6 for \$2.50

OLD FAVORITES

FRAU KARL DRUSCHKI—Pure White. A great favorite. The ideal hardy, pure white rose, perfect in form. A strong rugged grower doing well even under unfavorable conditions. Monthly blooming.

KAISERIN AUGUSTA VICTORIA—Ivory White. Best white hybrid tea. Long large ivory buds and double flowers. Vigorous, luxuriant.

MRS. AARON WARD—Cream Yellow. One of the finest and most beautiful of yellow roses. Continuously blooming. Buds are a rich golden fawn on opening quickly change to soft pink and cream. We want you to have at least one bush in your garden.

PAUL NEYRON—True Rose Pink. Immense globe-like flowers on long, stout stems. Bush hardy, vigorous and comparatively free from thorns. Add it to your rose garden.

RED RADIANCE—Cerule Red. Probably the best known and most popular of the lighter red shades. Big round blooms of cerise red.

SOUV. DE CLAUDIUS PERNET—Lemon-Yellow. Another new rose. Just what rose lovers have been looking for—a clear brilliant yellow—and what is more, one that does not fade. Exceptionally fine for cutting. Does best in hot, dry weather.

Golden Dawn

Hardy Perennial Plants

GROWN BY SPECIALIST—Big strong, whole-clump plants sure to grow and ready to bloom this summer. Much better than cheaper plants often sold. This is the second year we are offering these extra fine, whole clump perennials. Customers are enthusiastic in praise, and say they are worth much more than our low price.

AQUILEGIA—Columbine May-July. Selected hybrids. Daintiest out-door flowers. Grows anywhere, but prefers a moist, sunny spot. Every old-fashioned garden needs it.

CAMPANULA—Canterbury Bell. May-June. Another old-favorite covered with large bell-shaped flowers on long stems; Showy in mixed borders.

DIGITALIS—Foxglove. June-July. Old-fashioned, dignified and stately. Rich green masses of leaves always attractive and when in bloom this plant dominates the garden.

GAILLARDIA—Blanket Flower. June to frost. Vigorous grower in all soils. Quantities of fine blooms deep yellow shaded to rich brown and red at the centers. Good cut flower.

HOLLYHOCK—June-July. One of the most stately picturesque and beautiful plants in the world. There is always room for this old garden favorite. All colors, double and single blooms.

LIATRIS—Blazing Star. July-Aug. Thick, tufty masses of grass-like leaves out of which rise spikes of purple flowers. Easily grown; excellent for cutting.

PYRETHRUM—Painted Daisy. May-July. Ideal cut flowers; blooms uninjured by wind and sun. Perfectly hardy, grows everywhere.

SHASTA DAISY—June-August. Bright and sturdy, well known garden daisy. Large clear white petals, yellow centers.

SWEET WILLIAM. April-May. An old-fashioned favorite; spice-scented; flowers like pinks but borne in clusters; fine for cutting. Colors variegated.

Above Perennials—3 for 60c; 6 for \$1.00; 12 for \$1.75

HARDY PERENNIAL PHLOX

JULY-SEPTEMBER—These beautiful hardy border plants are the most effective things in the garden in late summer and fall. These newer varieties are much improved in beautiful coloring and large size of bloom, and offer a wide variety of rich colors. Phlox are easy to grow everywhere and ours are especially large clumps, ready to flower freely this summer.

AFRICA—Brilliant Red. Best red obtainable.

BEACON—Rosy Pink.

ECLAIREUR—Purple Crimson.

EUROPA—Late White with Red Eye.

MRS. JENKINS—Pure White.

PHLOX Price: Extra large, flowering clumps—3 for 75c; 6 for \$1.25; 12 for \$2.00

INSTRUCTIONS FOR ORDERING — PLEASE READ CAREFULLY

LOCATION:—Bridgman, Berrien County, Southwestern Michigan—the heart of the "Michigan Fruit Belt." Fast service to Chicago trunk lines east, west, north, south.

SEND NO MONEY FOR POSTAGE:—Mail Shipments Sent C. O. D. for Charges:—You pay the postman the exact amount of postage—no guesswork or overcharge. Cheaper for small orders and for larger ones to nearby states. Deliver to your door. C. O. D. insures against loss or damage and makes quicker delivery. Send cost of plants only and we will send C. O. D. for exact amount of postage.

EXPRESS SHIPMENTS:—Charges now reduced about 30 per cent on all shipments. Rapid handling and safe delivery guaranteed. Generally the best way of shipment. Cheaper for large orders or long distances. Charges not prepaid.

SHIPPING SEASON:—SPRING:—From about March 25th to May 15th to 25th, according to season. FALL:—Oct. 15th to Nov. 15th.

PACKING:—No charge. All plants packed in damp moss or shingle tow. Kill keep in good condition 5 days to 2 weeks, according to time of shipment and weather conditions. Each variety carefully separated and correctly labeled.

SUBSTITUTION:—Not without your permission except on late orders when time is often saved by substituting varieties of same season and value as those ordered. Satisfaction guaranteed or varieties substituted.

ORDER EARLY:—The earlier you order the surer you will be of

getting the varieties you want. Many varieties are scarce. Order now; we will reserve yours.

HOW TO ORDER:—Write your name and address plainly on enclosed order blank. Indicate "Mail," "Express," or "Our Judgment," as you prefer. If express shipment be sure there is an express office at the destination you give. Send remittance. Orders acknowledged.

PRICES:—See above and description pages. Prices good until June 1, 1936 except that any government taxes affecting nursery stock, that may be imposed, may be added.

TERMS:—Orders of \$5.00 or less, please send cash with order; if more than \$5.00; remit 25 per cent of total amount with order, balance before shipment. If you request, we will make C. O. D. shipments up to May 1st, when one-third of total amount is sent with order.

REMITTANCE:—Postoffice Money orders are safest. Express Money Orders, Bank Drafts and Personal Checks accepted. If you send Currency, register your letter.

REFERENCES:—State Savings Bank, Bridgman, Michigan; also local Express Agent or Postmaster.

COMPLAINTS:—All complaints as to condition on arrival, shortage or errors must be made within five days after stock is received. This allows ample time to examine shipments and if there is anything wrong, advise at once. Complaints as to condition on arrival must be accompanied by express or postoffice receipt showing statement of bad condition.

The Baldwin Guarantee—Your Protection—

For 47 years the Baldwins have backed up this guarantee to the entire satisfaction of their thousands of customers everywhere. We guarantee every plant, tree, shrub, or bulb sold by us to be first class, free from injurious disease or insects, and true-to-name. We further guarantee our stock to reach you in good growing condition and will replace free of charge any that does not, when we are notified within 5 days of receipt of stock. Also, we will, on proper proof replace or refund the purchase price of any stock that proves untrue to name. We are, of course, not liable for more than the purchase price of stock ordered.

All contracts and agreements are made subject to flood, drought, fire, frost, crop failure or other causes beyond our control.

There is a Growing Demand for Good ASPARAGUS

Mary Washington
Rust Proof

MARY WASHINGTON—Improved variety developed and recommended by U. S. Dept. of Agriculture. Heavy-yielding, pedigreed strain immune to rust; grows rapidly and produces uniformly tender shoots of excellent table quality. Much larger and better flavored than common kinds and now costs no more.

Now that canning companies have found how to can asparagus and retain all its delicious flavor and healthful food qualities they are contracting for increased supplies every year. At the same time there is a rapidly increasing demand from grocery stores for fresh asparagus during the summer season. You can make money growing good asparagus now!

Easy to Grow and Profitable

Asparagus is easy to grow and you can make big profits from only a small space. A bed lasts for many years. You can depend on heavy, regular crops from this quick-growing, rust-proof, Mary Washington variety.

It is most important that you get strong, healthy, true-to-name plants. We grow them by the thousand from guaranteed tested seed on special soil to give you the best planting stock possible.

SHADE TREES

Sizes Best Adapted to Transplanting. Express Shipment Only

CHINESE ELM

Finest All 'Round Shade Tree

(1) Beautiful as the Best American Elm, (2) Graceful as the Cut Leaf Birch, (3) Rapid growing as the poplar. A tree of rare beauty. Heavy, dark green elm type of foliage on fine twigs. Resists drought and cold, thrives on poor soil. Remarkably fast growing and graceful. A really satisfactory shade tree in every way. Be sure to plant Chinese Elm.

Stocky Trees Specially Priced

5 to 7 feet—Each 75c; 3 for \$2.00

AMERICAN ELM—One of our grandest native trees—"The Graceful Elm." A strong, vigorous grower; great size and unusually long lived.

A tree too well known throughout the country to need further description. Big trees at bargain prices. 7 to 9 feet—Each 70c; 3 for \$1.80

LOMBARDY POPULAR—Rapid growing spirelike tree reaching a great height. Unsurpassed for screens, narrow lots or background plantings. Plant for quick showing. 6 to 8 feet—Each 40c; 3 for \$1.15

SILVER MAPLE—Most desirable because of its quick growth, good foliage and gracefully spreading shape. Transplants readily; grows in any good location. Leaves light green, silver underneath. 6 to 8 feet—Each 50c; 3 for \$1.25

WEeping WILLOW—Spreading, graceful tree with long drooping branches. Long slender gray-green leaves—an imposing tree on any lawn. Grows rapidly in wet soil. 5 to 7 feet—Each 95c; 3 for \$2.45

Glads from Your Garden

Dorsett

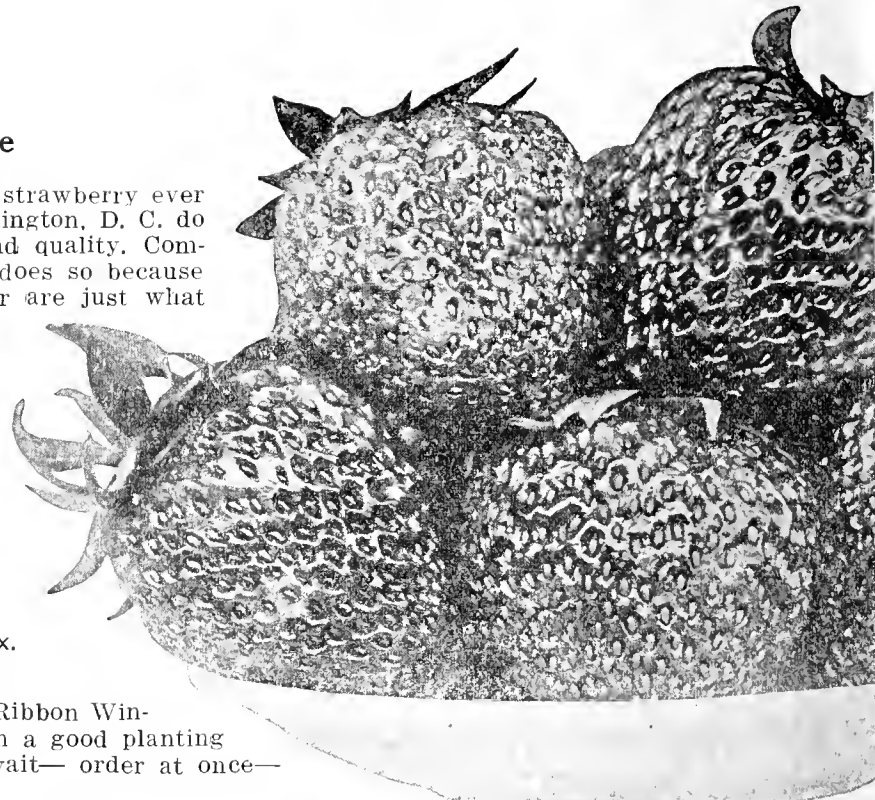

Has Every Desirable Strawberry Feature

Dorsett gives every promise of becoming the most profitable strawberry ever introduced. Experiment stations in Mich., Ill., N. Y., and Washington, D. C. do not hesitate to say that it is superior to Premier in size and quality. Commercial growers like Dorsett because it makes more profit. It does so because its firmness, big size, fine flavor and wonderfully bright color are just what both the wholesale buyer and the housewife want. Originated by the U. S. Dept. of Agriculture at Washington, and tested since 1923, it has proven superior in these points:

1. Ripens as early as Premier.
2. Average yield much more than Premier.
3. Very vigorous grower, making almost as many plants as Blakemore—assuring good crops even in poor seasons.
4. Firmer berries than Premier—firm as Blagemore—fine shipper.
5. Light red, glossy berries that buyers want and pay more for—sells best on every market.
6. Flavor superior to any other strawberry unless it is Fairfax.
7. Size well above average—larger than Premier.

With these features combined in one berry, you have a Blue Ribbon Winner for home or commercial use. You will make no mistake in a good planting this spring. We have a stock of fine, genuine Dorsett. Don't wait—order at once—there is a big demand.

New Low Price—100 for 95c; 1000 for \$5.25

Dorsett

"D & F" SPECIAL GARDEN

50 Dorsett 50 Fairfax
Only 98c; Two for \$1.68

Fairfax

At the Top for Firmness and Distinctive Quality

Like Dorsett, Experiment stations say that Fairfax is much superior to Premier, particularly in firmness and it is generally judged slightly better than Dorsett in excellent flavor. Originated by U. S. D. A. in 1925.

Fairfax Differs from Dorsett in These Ways:

1. Called the most deliciously flavored of all.
2. Even firmer berries.
3. Berries are larger—even larger than Dorsett.
4. Color dark red, turning darker after picking.
5. Does not make quite so many plants, but still better than Premier.
6. Not quite so productive as Dorsett but will average as good or better than Premier.

WHICH TO PLANT? These descriptions show that both are wonderfully fine berries. Both are of superior size and flavor, making either desirable for home gardens. The lighter, more attractive color of Dorsett may make it more profitable for the general market and most reports seem to prefer it. But the somewhat larger size and exceptional quality of Fairfax are to be considered.

Low Price—100 for \$1.00; 1000 for \$5.75

Gem Everbearing

A "Real Gem" for Garden or Market

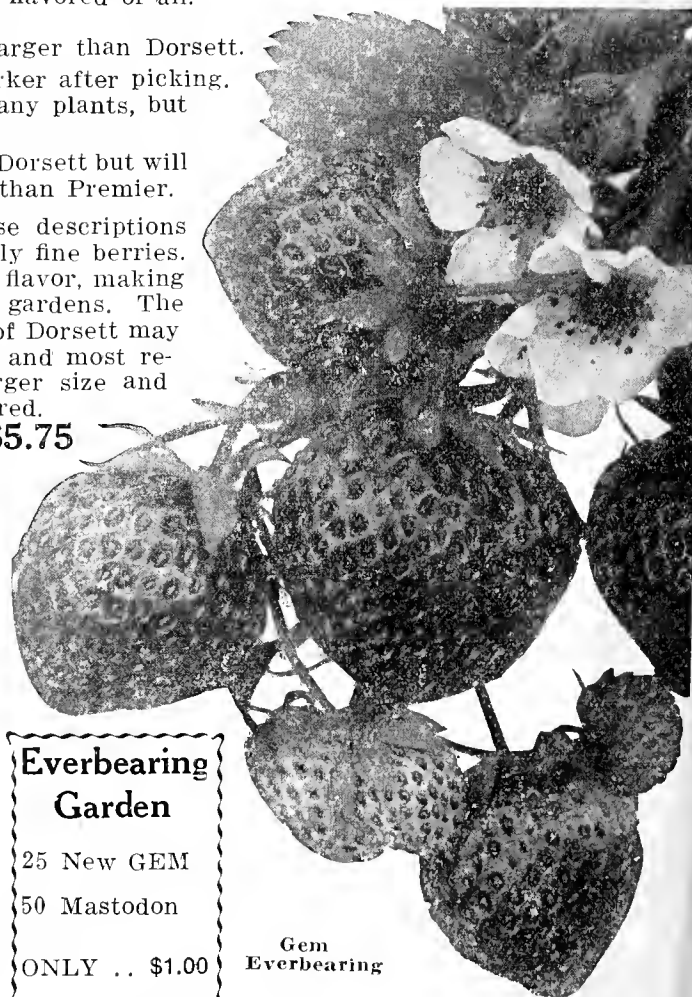

Large fields of GEM fruited in this section last fall and we know that in this new everbearer we have a really fine fall berry for good size, fine flavor and unusual firmness. It produces enough and more new plants in good and poor seasons to insure big fall crops. This is something other fall bearers do not do.

Size—Flavor—Firmness

1. **Size**—every berry well above average—from first to last picking
2. **Flavor**—a true strawberry flavor—something most everbearers don't have.
3. **Firmness**—remarkably firm—only everbearer that reaches market in really first class shape. Firmness and flavor are its big points.
4. **Productiveness**—GEM produces so many plants for an everbearer that some should be cut for best crops of biggest berries.

MICHIGAN EXPT. STATION SAYS—"Gem is certainly a wonder as far as plant making is concerned and it certainly bears well. It has done the best for us of any of the everbearers during the past season."

New Low Price—100 for \$1.25; 1000 for \$8.00
